## [Automata 2015 – 2 Homework]

[Automata Homework #1]

학번 인 이름 분반

Example 1.14] Grammar G가 다음과 같이 정의되었다.  $G = (\{A,S\}, \{a,b\}, S, P), P: S \rightarrow aAbl\lambda, A \rightarrow aAbl\lambda$  $L(G) = \{a^n b^n | n \ge 0\}$ 이 됨을 증명하시오.

## (a) YW EL, S\*>W

[basis] n=ogEH, W=入, S⇒入主台引

N=1 일にH, W=ab, S = aAb = ab 로 성引

[assume] n=kg四,w=abb、s等abb+abb+abb+ 目室かな

[induction] n=k+1 % w= akt | bet

S\$ atAbb > ata Abbb > att bit 3 del (b) \w, if S > W then wEL (ng derivation of 如好是证)

[basis] n=12 ch, S => NELOI / BB

n=2일때, 5⇒aAb>ab EL 이 성립

[assume] n=kgett, S\$atiAbtion 旨是对智 [induction] n=k+1일时, S\$atiAbtion 自己ない。Abbtion AkAbtel of なる Abbtion となる Abbtion となる Abbtion となる Abbtion となる Abbtion となる Abbtion となる Abbtion という Atia Abbtion Abbtion という Atia Abbtion Atia Abb

Exercises 1.2.11] Find a grammar for  $\Sigma = \{a, b\}$  that generate the set of all strings with exactly one a.

G=({S.A}, {a,b}, S.P), P:S+AaA, A+Abl)

Exercises 1.2.13] What language does the grammar with there products generates?  $S \to Aa$ ,  $A \to B$ ,  $B \to Aa$ 

GT Sentence generate का महामा अर्थे प्रमाण राष्ट्र symbol out ) देशे अर्थे अर्थे प्रमाण के कार्ये क
